

January 11, 2021

Dear King Members, Friends, and Family:

Our first day of vaccination clinics on Friday was very successful! Thank you to everyone who was vaccinated. Nearly 80% of our members got their first dose of the vaccine and will get their second dose on February 5th. Members and staff who did not participate in the first clinic and would still like to receive the vaccine will also be able to get it at the February 5th clinic. We strongly urge those who didn't receive their vaccine yet to do so.

Since my update on January 7th, we've had one member test positive for COVID-19 and one recover. There is also one new positive case among employees. Currently there are nine active positive cases of COVID-19 on campus (five members, four employees).

Sadly, we've learned that the death of a member who died in mid-December has been attributed to COVID-19. That member had tested positive in October and had recovered. Please understand that we work to provide you information as soon as we have it. We do not make the determination of cause of death and we follow the guidance of the medical examiner and local health department. Our deepest condolences go out to the member's family.

Further, while we have official information we are required to report to federal entities and others, we also try to share with you items that you might find useful or informative. Our intent is to reconcile these two goals without overwhelming you with too many communications.

Finally, as always, please continue safe practices that help protect against the virus such as avoiding gatherings, maintaining six feet of distance from others when going out, wearing a mask, and washing hands regularly.

Sincerely,

A handwritten signature in black ink that reads "T. Servatius".

Tammy Servatius, Commandant
