

January 25, 2021

Dear King Members, Friends, and Family:

We hope you are keeping warm during this chilly January. And as COVID-19 continues to proliferate in our communities, I hope you continue to abide by the safe protocols of mask wearing, hand washing, and social distancing.

Since my update on Thursday, January 21st, we've had two employees test positive for COVID-19. There are no new positive cases among members, however, sadly, one member with COVID-19 has died. We'd like to offer our deepest condolences of the family and friends of these members.

Currently there are nine active positive cases of COVID-19 on campus (three members, six employees).

In the interest of transparency, I'd also like to share that one member who has been recovered from COVID-19 since November has also died. The cause has been reported to us as COVID-19. Please understand that we do not make the determination of cause of death and we follow the guidance of the medical examiner and local health department. Our sympathies to the member's family.

As a reminder for those not on campus, starting today, individuals 65 years old and older are now eligible for the COVID-19 vaccine. We encourage you to check with your health care provider to learn how you can be vaccinated in your community. In addition, the Wisconsin Department of Health Services has [a weekly newsletter that you can sign up for](#) that includes updates on vaccine eligibility, the number of vaccinations administered in Wisconsin, as well as links to where Wisconsinites can find more detailed information and resources.

Sincerely,

A handwritten signature in black ink that reads "T. Servatius".

Tammy Servatius, Commandant
