

## Veterans Home - Chippewa Falls

### 5.13.2022 Veterans Home Family Updates

Dear Family & Friends,

Since our last update on May 12, we are reporting 2 new COVID-19 cases on campus (1 team member, 1 member). We have a total of 4 cases on campus (2 members, 2 team members) all pending PCR confirmatory results.

Please keep yourselves, your members, your family, and your coworkers safe during this uptick in cases by following all preventative measures and by wearing your masks in public as the cases in our area continue to rise. If you do plan to visit our campus, KN95 masks or accommodating facial coverings are required while in our building and visitors will have to do a quick health check assessment upon arriving.

It is reported that COVID-19 cases are on the rise at this time throughout the nation. Staying up-to-date with your COVID-19 vaccination will help you and your loved ones stay healthy and safe throughout the spring season. To do so, be sure to receive any boosters you're eligible to receive. If you need help finding a vaccine or have questions about available COVID-19 boosters, please contact us.

Thank you for your commitment to safety at our veterans home!

Best,
