

September 28, 2021

Dear King Members, Friends, and Family:

As the surge in people with COVID-19 continues, the public health community is reminding people that it is especially important this year to get a flu shot, in order to help ease the strain in hospitals and clinics. Right now, nearly 90% of hospital beds and 91% of ICU beds are in use, according to the state Department of Health Services.

Since we updated you yesterday, we have had two members test positive for COVID-19. Currently we have nine cases of COVID-19 on campus (four members, five employees).

As a reminder, we are reminding visitors to check in before visiting campus so that you can ensure that you will not be disappointed when you arrive. Call or visit [www.WisVetsHomesCOVID.com](http://www.WisVetsHomesCOVID.com) before visiting.

Please continue to adhere to the guidance set by the Centers for Disease Control when it comes to face coverings, social distancing, and hand washing.

Sincerely,

A handwritten signature in black ink that reads "T. Servatius".

Tammy Servatius, Commandant
